

t.BAEU - Bachelorarbeit Energie- und Umwelttechnik

Person responsible for the course: Joachim Borth, bthj
Credits: 12
Valid for: 2011/2012
Last saved: 05.03.2012 18:44

Learning objectives:

Application of engineer-like thinking and acting at a practical-oriented task. Preferably performed in close collaboration with an industrial partner. Transfer of the knowledge and skills gained during study into practicable application.

Course content:

Practical work: The integrated handling of a problem and broadening of the knowledge obtained during the studies are the basics to understand and analyze the task and setting up models.

The essential parts of the bachelor's thesis are usually: Structuring and planning of the process, realization of the task, writing the report, writing abstracts in German and English.

At the end an oral presentation takes place in front of experts.
