

t.MLAE2 - Mathematik: Lineare Algebra für Ingenieure 2

Person responsible for the course: Marcello Robbiani, roma

Credits: 3

Valid for: 2011/2012

Last saved: 07.09.2011 09:45

Learning objectives:

This course

- provides the mathematical armamentarium and the mathematical skills needed for the engineering courses
- introduces to the mathematical approaches of problem solving and trains abstract thinking
- allows for the common knowledge in mathematics

Course content:

linear algebra

- linear spaces
- linear transformations
- linear operators
- eigenvectors and eigenvalues
- eigenproblems in engineering

complex numbers:

- operations
- representations
- applications in the theory of vibrations

Previous knowledge:

-

Teaching method:

Type of lesson:	Number of lessons per week:
Lecture	14x(2L+2L)
Tutorial/Practicum	
Group teaching	
Block instruction	
Seminar	

Assessment:

According to the table or as specified in writing by the lecture at the beginning of the semester!

Number	Type	Weighting
1	End of term exam	0,6
2	Exam during the semester	2 x 0,2
	Further assessments	

Language of instruction:

German

Instruction material:

Depending on lecturer

Fischer: Analytische Geometrie. Vieweg.

Fischer: Lineare Algebra. Vieweg.

Kowalsky, Michler: Lineare Algebra. de Gruyter.
